

PRODUCT DATA INFORMATION

RECOIL ECO

DESCRIPTION

A safer friendlier Aluminium and metal coil and filter cleaner, for both the coil and the environment. Recoil Eco is biodegradable and extremely gentle on the coils. Containing emulsifiers and detergents, and designed for multi metals, Recoil Eco will not attack aluminium or copper coils components, thereby extending equipment life.

CHEMICAL PROPERTIES

	Blend of Alkali and surfactants
pH	13.0 – 13.5
Specific Gravity	1.175

USES

Designed to clean air conditioning coils and permanent filters.

A multi metal degreaser.

GENERAL INFORMATION

Aluminium will not be affected if left in contact for too long, however it is always best practice to thoroughly rinse off product after cleaning.

Recoil Eco has excellent rinsing properties; however, the coils must be thoroughly rinsed to ensure no chemical residual is left behind.

Low silicate level as compared to conventional silicate-based cleaners.

METHOD OF USE

- Dilute 1:2 with water
- Spray solution on aluminium fins or evaporator.
- Leave for not more than 5 -10 minutes.
- Rinse off thoroughly with water pressure.

VENTILATION

Vapours may cause irritation to upper respiratory tract. Avoid windy areas.
